

BUFF MAGIC®

- **A ONE-STEP COMPOUND THAT'S PERFECT FOR BRINGING OUT A SHINE IN BOATS PULLED FROM FIBERGLASS MOLDS**
- **EFFECTIVE ON GEL COAT, PAINT, EPOXY FINISHES, COUNTERTOPS, PLASTICS, AND MORE**
- **A DIMINISHING ABRASIVE THAT STARTS AGGRESSIVE BUT FINISHES WITH A DEEP, RICH SHINE**
- **ALREADY USED BY MANUFACTURERS ALL OVER THE WORLD FOR ITS EFFICIENCY AND EFFECTIVENESS.**
- **ALSO AN EFFECTIVE METAL POLISH**

Buff Magic is a variable grit compound designed by Shurhold Industries to quickly and efficiently increase the gloss of gel coat, paint, or epoxy finishes. Originally designed for DIY oxidation removal, Buff Magic has found itself in manufacturing facilities all over the globe as the finishing compound of choice for brands like SeaRay Boats and other industrial giants. Eliminate compounding steps, saving both man hours and material costs while achieving better results with Buff Magic.

BEST PRACTICES

The product performs best when combined with a rotary polisher and a clean wool cutting pad. The product comes as a thick paste, which should be applied using a chip brush. At a speed of 1200 RPM, work the product into the surface using an overlapping pattern until Buff Magic has broken down completely. Remove excess material using a microfiber towel.
